EXPERIENCE

Web Developer Intern (WordPress and Shopify)

July 2025 – August 2025

Rebaaz.

Lahore, Pakistan

- Developed and customized the company's official website using WordPress and Elementor, focusing on responsive and visually engaging designs.
- Collaborated with the design team to align the website's layout and branding with Rebaaz's sustainability vision.
- Managed content updates, performed testing across devices/browsers, and ensured website accessibility and stability.
- Customized Shopify Liquid sections including Hero, Our Story, Roadmap Timeline, and Sustainability pages with interactive animations and scroll effects.
- Enhanced storefront UI/UX with responsive layouts, hover animations, and dynamic visual storytelling.
- Integrated design consistency across Shopify pages and improved site usability for a smoother customer experience.

PROJECTS

AI-Powered Multifunctional Chatbot | *Python, Gradio, Hugging Face*

- Developed a multimodal chatbot with text and voice interactions using Gradio and Hugging Face transformer models.

Lung Cancer Detection using ML | *Python, Scikit-learn*

- Built ML models with EDA and feature engineering to predict lung cancer with high accuracy.

Online Tutoring Platform (StudyPool Clone) | *PHP, MySQL, Stripe API*

- Created a tutoring platform with user authentication, course management, and Stripe-powered payments.

Multi-Brand E-Commerce Platform (Bliss Cart) | *React, Redux, Tailwind CSS*

- Developed a responsive multi-brand eCommerce site with optimized UI and state management using Redux.

Weather Data Analysis | *C#, SQL, Power BI*

- Analyzed historical weather data and built Power BI dashboards for visual trend insights.

Command Line Interface for DSA | *C++, OOP*

- Implemented core data structures and algorithms in a command-line interactive application.

Space Shooter Game | *C++, C#, .NET*

- Designed a 2D space shooter game with scoring, collision detection, and health systems.

Employee Management System | *C++, C#, .NET*

- Developed a desktop app for employee records, payroll, and performance management.

EDUCATION

University of Engineering and Technology

Bachelor of Science in Computer Science

Lahore, Pakistan

2022-2026

TECHNICAL SKILLS

Programming Languages and Web Development:: C, C++, C#, PHP, Python, HTML, CSS, JavaScript, React, Tailwind CSS, Material UI, Redux.

Databases and Tools: : MySQL, SQL, SSMS, VS Code, .NET, Vite, Stripe API, Power BI, Unity.

AI and Data Science: : Scikit-learn, TensorFlow, Keras, OpenCV, Matplotlib, Seaborn

EXTRA-CURRICULAR ACTIVITIES

Certificate of software coding at **Women Tech Competition** by **10 pearls**

Certificate of **SOMNIX Workshop** (Game Development with Unity)

Membership of **UET XNews Society**
